Getting to Specifics from the Big Picture:
A Research Forum for Energy Futures and Strategies
Gas/Power Linkages

Draft Agenda

8:30-9:00	Registration	
9:00-9:30	Why study gas-power linkages? Both upstream economics and gas demand in the power sector are subject to many uncertainties. The bigger mix, including midstream and NGLs, complicates the picture.	Michelle Foss, BEG-CEE
9:30-10:15	ERCOT case studies ERCOT long term planning and related issues	Warren Lasher, Manager, Long-Term Planning & Policy, ERCOT
	Adding intermittent renewables	Joo Jin Hyun, UT-Austin, Department of ECE
10:15-10:30	Break	
10:30-11:15	Water-Energy-Economy Nexus: water scarcity → impact on power generation & upstream operations → economic impact	Brad Wolaver, BEG
11:15-11:45	CEE Analytics (combined impact of EPA regulations, carbon pricing, CEE natural gas price scenario and renewables policies on power systems and demand for gas)	Gürcan Gülen, BEG-CEE
11:45 – 1:15	Luncheon brainstorming Energy Webs II: A web-based experiment on public perceptions of energy options	Michelle Foss, BEG-CEE
