Panel Session
TECHNOLOGY COMMERCIALIZATION: ENERGY POLICY ACT 2005
Wednesday, 3 May 2006 – 0930 to 1230

Over the past six years OTC panel sessions have examined technology commercialization from many different perspectives: international consortiums/organizations, venture and private capital models, industry initiatives, etc. With the signing into law of the Energy Policy Act 2005, sub-part J authorizes funding of a Program Consortium to administer a research, development, demonstration and commercial application program of technologies for ultra-deepwater and unconventional natural gas and other petroleum resource exploration and production, including addressing the technology challenges for small producers, safe operations and environmental mitigation.
