Body

Washington: Arizona Geological Survey has issued the following data information: This dataset is a compilation of borehole temperature observations compiled by the Texas ***Bureau of Economic Geology***, published as a web feature service, an ESRI Service, a web map service, and as an Excel spreadsheet for the National Geothermal Data System. The spreadsheet contains 6 worksheets, including information about the template, notes related to revisions of the template, Resource provider information, the data, a field list (data mapping view) and a worksheet with vocabularies for use in populating the spreadsheet (data valid terms). For more information see links provided. Original document can be found here:
