Scope:

The University of Texas - **Bureau of Economic Geology** (UT-BEG) has completed extensive studies on the distribution, abundance, and status of wetlands and aquatic habitats along the Texas coast, providing critical information on the preservation and protection of wetland functions and uses. Based on study findings, UT-BEG produced a series of GIS datasets and reports for coastal scientists, managers, planners, and decision makers to use as guidance for mitigation/restoration projects. In this project, UT-BEG will develop a user-friendly, interactive, web-based display of GIS-based maps of historical and current Texas wetland types, boundaries, and distribution.

Project completion date : 2020-12-31 12:00:00

Major organization : THE UNIVERSITY OF TEXAS - **BUREAU OF ECONOMIC GEOLOGY**

Address : 10611 Exploration Way,  
Austin, TX 78758

Country :United States

Financier address : Coastal Management Program (CMP)

1700 N. Congress Ave. Austin,
