

Figure 35. Loci of recurrent thickness anomalies in the San Andres/Blaine Formation, superimposed on a structure-contour map drawn on the top of the underlying Tubb sandstone, Potter County, Texas Panhandle. Horizontally-hatched areas denote persistent thins; vertically-hatched areas denote persistent thicks. Tubb sandstone structure-contour map is unpublished data generously provided by Roy T. Budnik, Bureau of Economic Geology, The University of Texas at Austin, 1984.
