## Alex S. Broun Geology Collection donated to the University of Texas Bureau of Economic Geology

📅 January 21, 2021   👤 Robin Gary   📁 Posts

The Hays Trinity Groundwater Conservation District recently honored a local geologic legend, Al Broun. His work interpreting geophysical logs, collaborating on field studies, and contributing and reviewing reports as vastly improved understanding of the Trinity Aquifers in western Hays County. We join the HTGCD in celebrating Al Broun and thank him for his important contributions.
