

## Biography

**John Andrews** is a research scientist associate at the Bureau of Economic Geology where he has worked on Lidar projects since 2000. Though versed in various GIS and RS applications, he is primarily interested in developing software for custom solutions to unique spatial data-processing problems including feature extraction and geomorphic characterisation.

Hydro International started out as a print magazine in 1996 and soon developed into the multimedia platform it is today, featuring a successful website and respected weekly newsletter. Hydro International is published six times a year. The magazine is international in scope and focuses on bringing to its readership topical overviews and the latest news and developments in the technology and management of hydrographic and oceanographic activities.
