/ on tenterhooks ▶ Shell sees 2024 aviation fuel demand recovering to pre-pandemic levels ▶ Oil Climbs Fron

An advertisement for Vista Projects. The top left features the Vista Projects logo. The top right says "High-Quality Integrated Engineering" and "Helping engineering, procurement and construction teams for over 37 years." The main body is divided into four green boxes with white text, each accompanied by a small image: "Cost-Effective" (industrial towers), "Digital Transformation" (digital interface), "Solutions-Focused" (industrial facility), and "Transparent Approach" (industrial facility). The bottom of the ad features a large image of two workers in blue overalls and hard hats working on a large industrial pipe. At the very bottom, a small line of text reads: "CLICK TO LEARN MORE ABOUT HOW YOU CAN MAXIMIZE THE VALUE OF YOUR INDUSTRIAL ASSETS TODAY!"

An advertisement for "ENERGY INNOVATIONS". It features a portrait of Geoffrey Cann, a man with glasses and a suit. The text reads: "ENERGY INNOVATIONS", "Emerging Technologies & Digital Innovations", "Weekly Interviews & Discussions with Geoffrey Cann". Below this is a large black button with white text that says "Subscribe TODAY & Click the Bell" with a red bell icon and a white arrow pointing right. The EnergyNow Media logo is in the bottom right corner.

An advertisement for "SEG | AAPG Image". The left side features a dark blue background with a white house-like shape containing the SEG | AAPG logo and the word "Image" in large white letters. The right side features a teal background with a black oil pumpjack and a woman with blonde hair speaking at a podium. A green banner at the bottom right says "Join top energy professionals".

Houston, TEXAS

The Opening Session is scheduled for 28 August at 4:00 PM at the George R. Brown Convention Center and will begin with welcomes from SEG President Anna Shaughnessy and AAPG President Steven Goolsby, followed by presentations of SEG's Maurice Ewing Medal and Virgil Kauffman Gold Medal, AAPG's Sidney Powers Memorial and Michel T. Halbouty Outstanding Leadership awards, and AGI's Marcus Milling Legendary Geoscientist Medal.

This session also features and concludes with a thoughtful and compelling panel discussion on **The Many Faces of Energy Poverty**. When it comes to energy, the political discourse and media framing are often centered on climate change, renewables, net-zero emissions and, most recently, EVs and the price at the pump. What's seldom punctuated is the fact that 45% of the world's population still struggles with access to energy for basic needs.

Join our panelists, moderated by Dr. Scott Tinker, as they share their personal experiences with the many faces of energy poverty: access, environmental impact and reliability, and investment and security.

Moderator:

Scott Tinker, Director, Bureau of Economic Geology; State Geologist of Texas; Professor, Edwin Allday Endowed Chair in Subsurface Geology, Jackson School of Geosciences, The University of Texas at Austin

Panelists:

- **Lorena Moscardelli**, Research Scientist and Principal Investigator, State of Texas Advanced Resource Recovery (STARR) Program, Bureau of Economic Geology, Jackson School of Geosciences, The University of Texas at Austin
- **Syed Talha Tirmizi**, MS Petroleum Engineering, Hildebrand Department of Petroleum and Geosystems Engineering, The University of Texas at Austin
- **Aken Tong**, Founder, Seeding Mercy Inc.

About AAPG

The American Association of Petroleum Geologists (AAPG) is one of the world's largest professional geological societies. AAPG works to advance the science of geology, especially as it relates to petroleum, natural gas, other subsurface fluids, and mineral resources; to promote the technology of exploring for, finding, and producing these materials in an economically and environmentally sound manner; and to advance the professional well-being of its members. AAPG was founded in 1917 and is headquartered in Tulsa, Oklahoma; currently almost one-third of members live outside the United States.

About SEG

The Society of Exploration Geophysicists is committed to connecting and inspiring the people and science of geophysics. With more than 13,000 members in 116 countries, SEG provides educational and technical resources to the global geosciences community through publications, books, events, forums, professional development courses, young professional programs, and more. Founded in 1930, SEG fosters the expert and ethical practice of geophysics in the exploration and development of natural resources, characterization of near surface, and mitigation of earth hazards. For more information, visit www.seg.org.
