when people start using Religious entity we know we r up creek without a paddle

Religion was only created to control & suppress/quell the beast in the masses to suppress them nothing more , Just like communism

**RE: Bureau of Economic Geology**

5 Feb '23

Sousa's team met with the University of Texas' Bureau of Economic Geology.

"We need an updated reservoir study that goes back to raw data, all the way back 48 years ... so that we drill it properly and extract the maximum hydrocarbons that God left us."

**Bureau of Economic Geology**

5 Feb '23

5 days ago

After a week in Timor-Leste we are having a great visit this week to the Perth Core Library in Australia. This is a collaborative multidisciplinary project between TIMOR GAP, E.P. and the Bureau of Economic Geology. The study is focusing on offshore gas reservoirs in the Greater Sunrise Field. Fascinating datasets and depositional system, and huge importance to the new country of Timor-Leste. Glad to be a part of this project!

[The Bureau provides advisory, educational, technical, and informational services related to the resources and geology of Texas, the nation, and the world]
