UPC Enhanced Cooperation with BEG of UT-Aus

On December 7, professor Mark Shuster, the executive Deputy Director of the Bureau of Economic Geology of the U of Texas at Austin, led a delegation to visit UPC. The president of UPC, Academician Hao Fang met with the guests, and the two sides he discussed research cooperation and the construction of joint laboratory for international cooperation in petroleum energy.

Hao Fang welcomed the guests, and introduced the disciplinary development, talent cultivation, scientific research and Guzhenkou campus construction and other performance of UPC. He also showed that UPC and UT-Austin have a long history of cooperation, and hoped to take the visit as an opportunity to deepen the cooperative partnership, further strengthen the cooperation in joint declaration of fund projects, high-level talent exchange and the construction of global lacustrine sedimentation research center, and to promote the educational performance and influence of both sides.

Mark Shuster and Mr. Jay Kipper highly recognized the development achievements of UPC in recent years, and introduced the Geodynamics Laboratory, Reservoir Characteristics Research Laboratory, Integrated Seismic Research Center and their research results. They also expressed enthusiastic willingness to deepen cooperation with our university and contribute to China-US educational exchanges.

The Office of International Affairs and School of Geosciences of UPC introduced our international cooperations and the construction of joint laboratory for petroleum energy and Gas. And the two sides exchanged in-depth views on common concerns such as the construction of the joint laboratory for petroleum energy and scientific research cooperation, and reached cooperation intentions.

After the discussion, the delegation visited the Key Laboratory of Deep Oil and Gas and gave academic lectures on sha machine learning for teachers and students.
