

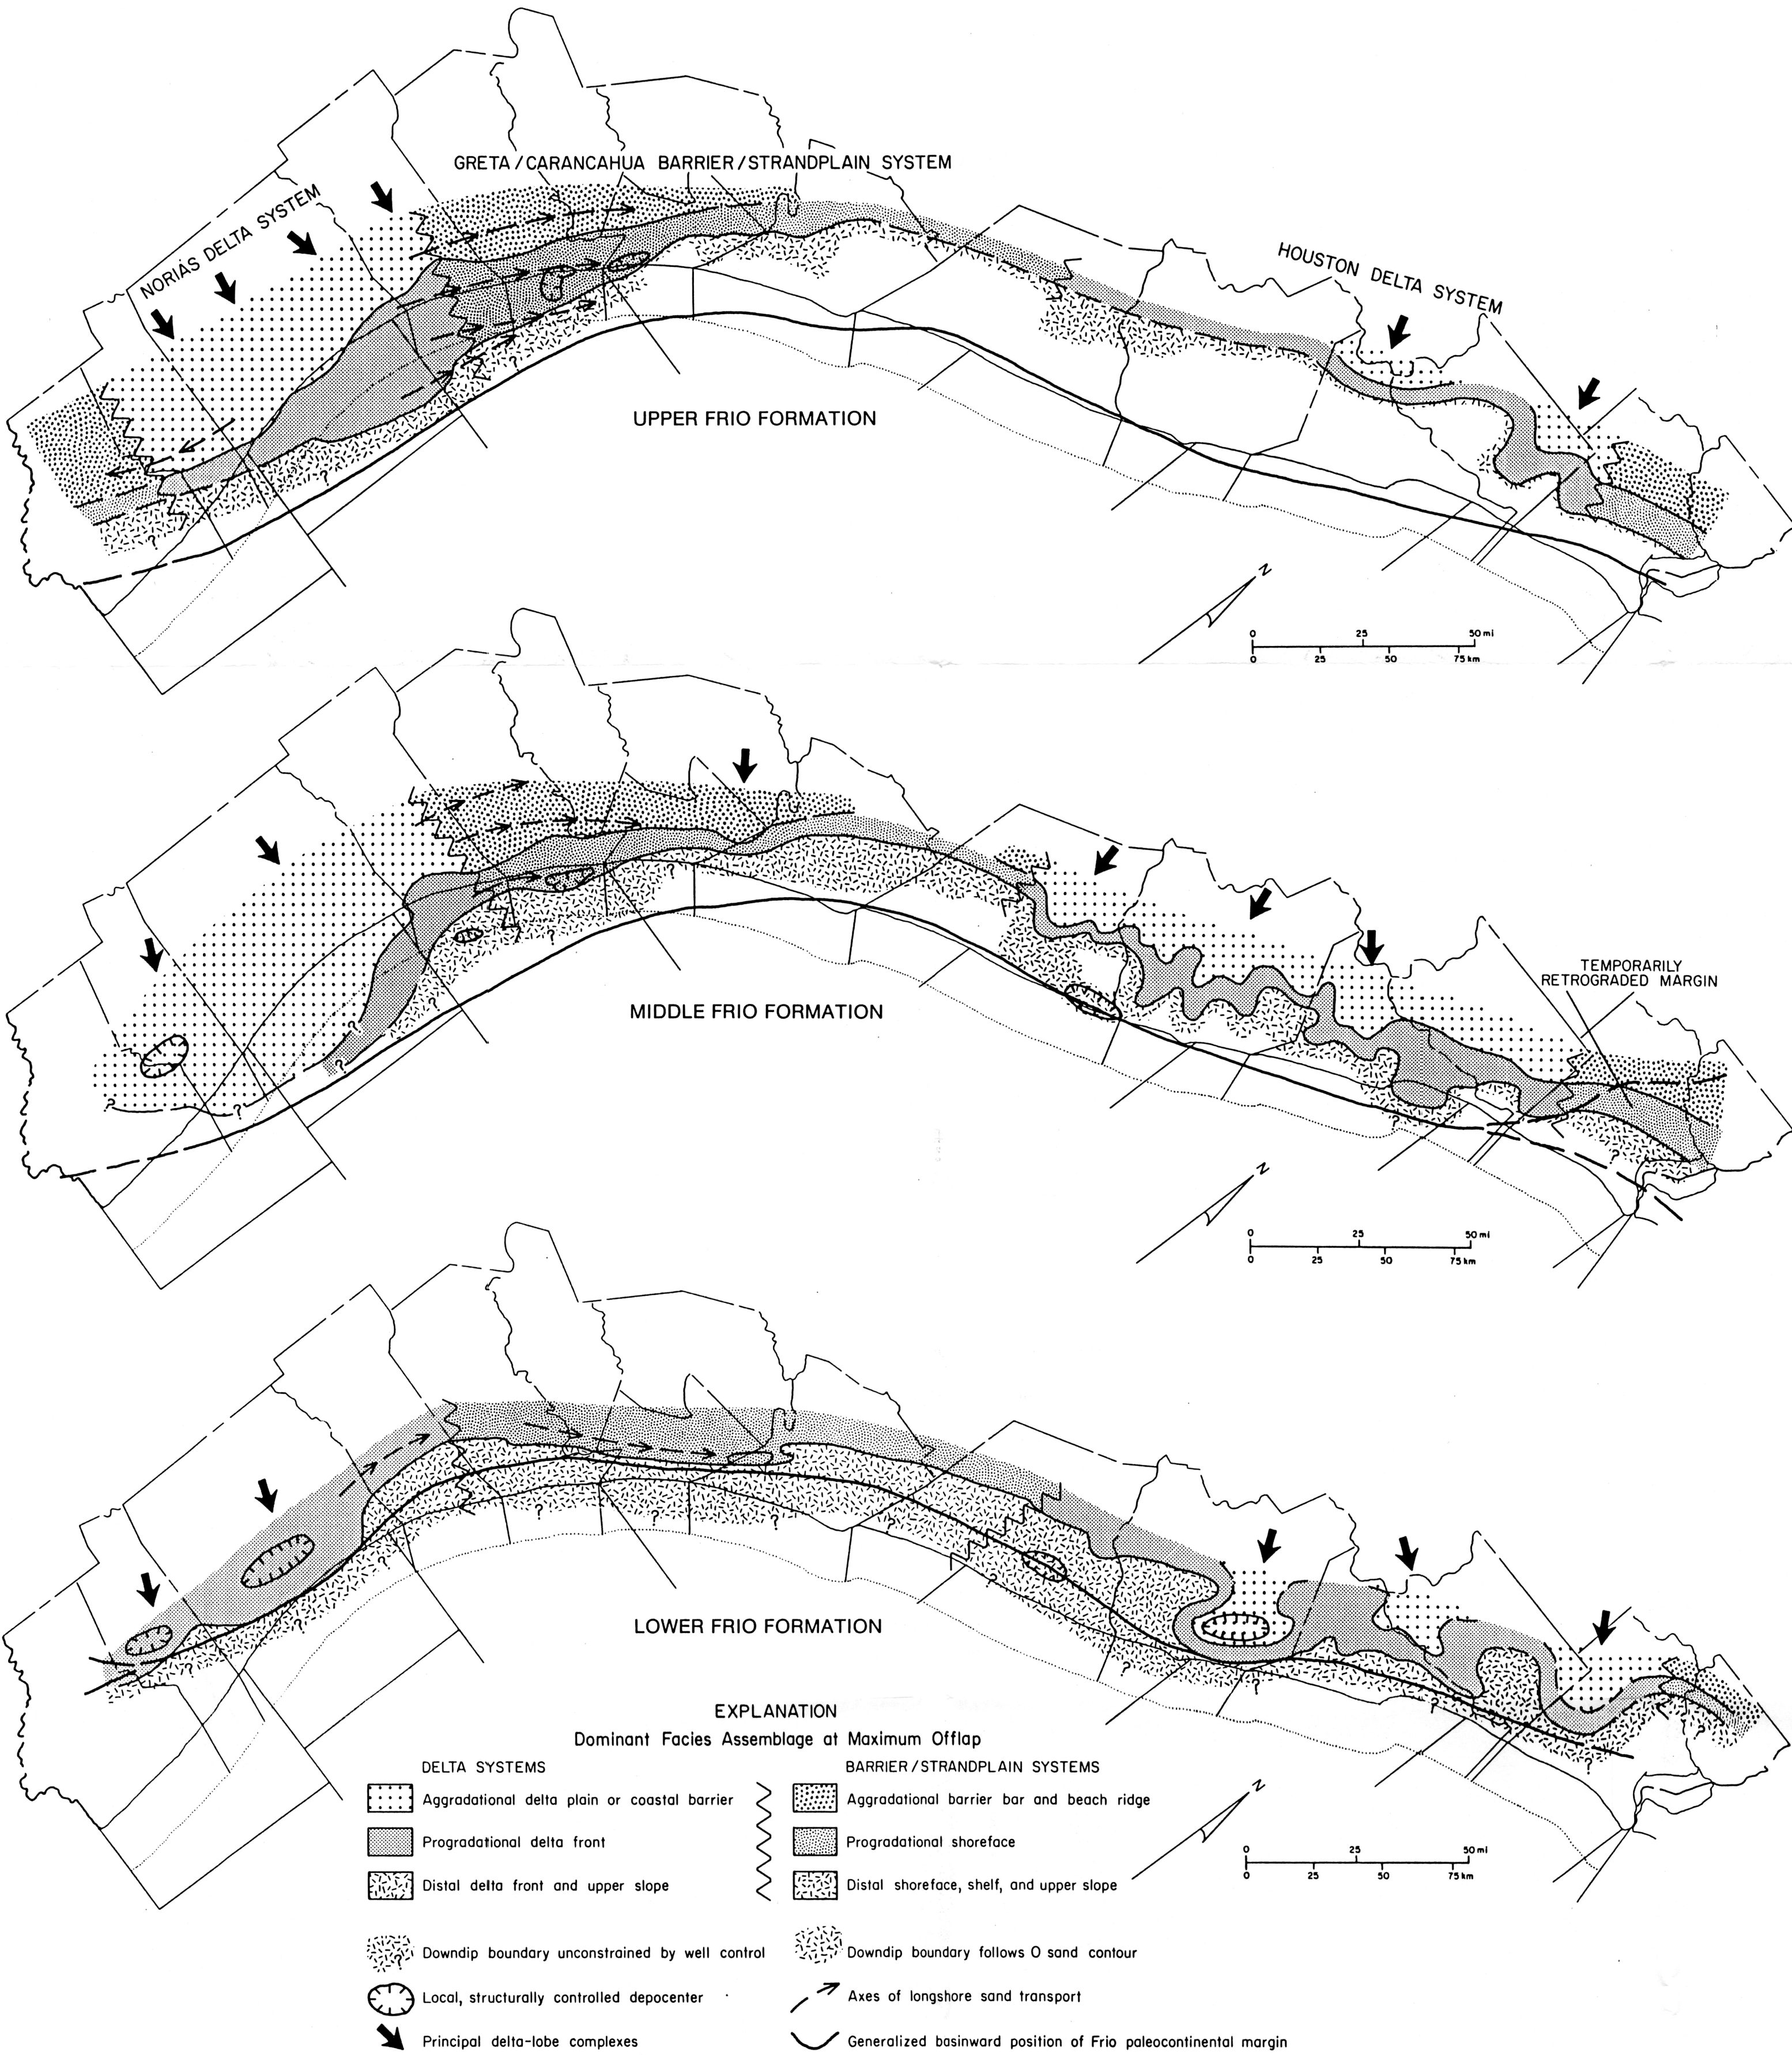

PLATE 2a. Structural features of the downdip Frio Formation.

by William E. Galloway

QA 4364

Cartography by Richard M. Platt under the supervision of Richard L. Dillon

PLATE 2b. Interpreted downdip depositional elements and component facies assemblages of each of the three operational Frio units. Also shown are local structural depocenters, primary directions of sand transport, and the generalized position of the paleocontinental margin at maximum offlap of each of the three intervals.
