

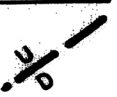

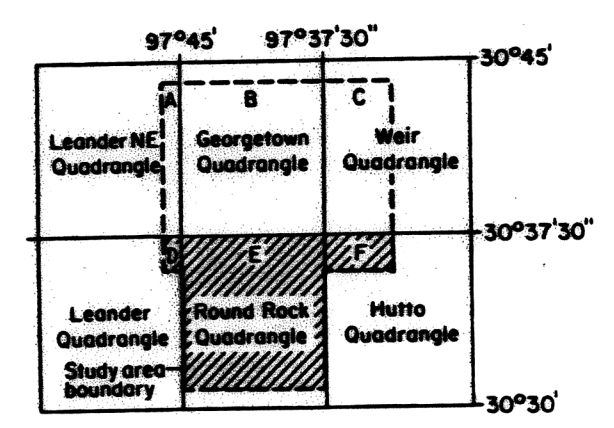

**PLATE 2b. BEDROCK GEOLOGIC MAP OF  
THE GEORGETOWN-ROUND ROCK AREA,  
WILLIAMSON COUNTY, TEXAS**

**EXPLANATION**

- |  |     |  |
|--|-----|--|
| <div style="border: 1px solid black; width: 20px; height: 10px; display: inline-block;"></div>   | Kau | Austin Group - Chalk, marl, and limestone, light gray to white, thin to thick bedded, massive to slightly nodular  |
| <div style="border: 1px solid black; width: 20px; height: 10px; display: inline-block;"></div>   | Kef | Eagle Ford Formation - Shale and silty limestone to calcareous siltstone; shale, dark gray; silty limestone to calcareous siltstone in middle part of unit, flaggy, gray to yellow brown     |
| <div style="border: 1px solid black; width: 20px; height: 10px; display: inline-block;"></div>   | Kbu | Buda Formation - Limestone, shell fragments, glauconitic, hard, slightly nodular, gray to tan  |
| <div style="border: 1px solid black; width: 20px; height: 10px; display: inline-block;"></div>   | Kdr | Del Rio Formation - Clay, abundant <i>Exogyra arietina</i> , pyritic, gypsiferous, calcareous, dark gray to olive brown  |
| <div style="border: 1px solid black; width: 20px; height: 10px; display: inline-block;"></div>   | Kgt | Georgetown Formation - Limestone and some marl, nodular to bedded, gray to tan; abundant fossils include <i>Kingena wacoensis</i> and <i>Graphaea washtaensis</i>                            |
| <div style="border: 1px solid black; width: 20px; height: 10px; display: inline-block;"></div>   | Ked | Edwards Formation - Limestone and dolostone, massive to thin bedded, fine to medium grained, chert, honeycombed and cavernous in part, hard and brittle in part, gray to tan, fossil rudists |
| <div style="border: 1px solid black; width: 20px; height: 10px; display: inline-block;"></div>   | Kc  | Comanche Peak Formation - Limestone and some marl, nodular, light gray to white  |
|  Fault: U, upthrown side; D, downthrown side; dashed where inferred, dotted where covered |     |  |
|  Contact: dotted where covered  |     |  |
